The **Project Definition Reference Guide** shows you how to plan and execute the project definition phase of the fast track process.

What is the Fast Track Process?

It's not a short-cut - It's a solution!

The *fast track* concept is simple, straightforward, and ready-for-use. When resources are limited, and time is in short supply, you have to make the most of every available tactic, tool and strategy.

The Fast Track Project Toolkit shows you how to set priorities, minimize redundancies, leverage available resources, and apply standardized tools and practices to suit individual projects. Every step, tool and template is connected in a streamlined process designed to produce required results in the shortest time possible!

The *Toolkit* gives you everything you need to execute our time-saving *fast track management model* - from project proposals to post project reviews.
