

Welcome to the preview of the Fast Track Project Toolkit Instruction Manual Table of Contents

<http://www.ittoolkit.com/fast-track-project-toolkit.html>

The Instruction Manual shows you how to start off on the right track and end up with a successful project. It provides steps and guidelines for using all of the tools in the kit.

What is the Fast Track Process?

It's not a short-cut - It's a solution!

The *fast track* concept is simple, straightforward, and ready-for-use. When resources are limited, and time is in short supply, you have to make the most of every available tactic, tool and strategy.

The Fast Track Project Toolkit shows you how to set priorities, minimize redundancies, leverage available resources, and apply standardized tools and practices to suit individual projects. Every step, tool and template is connected in a streamlined process designed to produce required results in the shortest time possible!

The *Toolkit* gives you everything you need to execute our time-saving *fast track management model* - from project proposals to post project reviews.

Take a peek at the Table of Contents for the Instruction Manual, part of the Fast Track Project Toolkit.
